

Sprint Report 2
FakeNooz
By the Scrumbags
February 21, 2018

Actions to stop doing: Our communication during this sprint was a bit spotty due to mixed usage of slack and/or text. A lot of confusing for scrum meeting times, but for the most part everyone makes it to the best of their ability.

Action to start doing: Going over documentation all together during SCRUM meetings. Also, maybe still work on taking time to explain code to those who don't fully understand each part.

Actions to keep doing: We should be more diligent with picking meeting times when our usual regular hours don't work for everyone. Being very communicative with every member through slack or text helps keep everyone in the loop of how the project is going.

Work completed: The team completed a working demo implementing the GUI and the backend code by the end of this sprint to present to the TA. All 4 user stories written in our sprint plan were completed.

Work completion rate: 4 user stories completed. 31 of 31 hours completed. 14 days for completion of entire sprint. 3.5 days per user story and about 2.6 hours per day for workload. 5.25 hours per day on average user story per day and 2.7 hours per day on average for entire project.
