

Sprint Report 1
Fake Nooz
By the Scrumbags
2/2/18

Actions to stop doing: We believe that all the actions we are currently doing are working well and should be continued. Apart from the small change of moving from Slack to discord for our communication

Actions to start doing: Taking a bit of time after the SCRUM meeting to have people who pushed code for a task they completed to explain their code in high level terms to the other members of the team so we all have an understanding of each part.

Actions to keep doing: We would like to keep meeting often as well as breaking up tasks into small pieces that can be tackled by 1 or 2 people at most and then merged back together as we feel this is fastest.

Work Completed: The team successfully adjusted to using python 3 and everyone got their development environment set up. This means User Story 4 was completed. We also output to files for the user meaning User Story 1 was completed. User stories 2 and 3 both rely on the same algorithm of sentence matching that is still being worked on.

Work Completion Rate: 2 user stories completed. 13 of 26 ideal hours completed. 7 days occurred since our original breaking up of the stories to tasks.

Burnup Chart:

Sprint 1 Burnup
