# FakeNooz

Team name: Scrumbags
Release name: Desktop App
Release date: March 12, 2018
Revision number: V3.0
Revision date: February 23, 2018

## HIGH LEVEL GOALS

- Natural Language Processing that analyzes sentences
- Compare various articles and find overlapping and non overlapped facts/claims
- Categorize articles into similar sections
- Web scraper to get most articles from various source URLS
- Desktop app with GUI
- Articles presented cleanly to user

## USER STORIES

- Sprint 1
  - As a reader, I want my news to be confirmed by several sources to weed out false news.
  - As a reader, I want to know what statements are contested so that I can investigate contested claims on my own.
  - As a reader, I need news that is not biased so that I can make my own opinions.
- Sprint 2
  - As a reader I need an easily navigable way to read the news.
  - As a reader, I need the most important stories to show up first so that I can get a quick overview of current news.

- - As a reader, I want related articles to be picked out automatically so that I don't need to find them.
    - As a reader, I want to be given a list of articles related to an article that I give so that I can see multiple perspectives.
  - Sprint 3
    - As a reader, I need the sentences synthesized into a cohesive output so I can read the news easily.
    - As a user, I need the GUI to output to me so I don't have to go to the file directory.
    - As a developer, I need the code to be clean and rid of dependencies so it easily extended.

PRODUCT BACKLOG
- As an advertiser, I want to know data about readers so that I can effectively advertise to them (*should have website).
- As a reader, I want to view photos so that I can get an accurate picture of the events happening.
- As a reader, I need a mobile or web-based app so that I can read news away from my home computer.
